MANAGEMENT DISCUSSION AND ANALYSIS

The Management of Amines and Plasticizers Limited is pleased to present its Management & Discussion Analysis Report before the Shareholders of the Company.

BUSINESS OVERVIEW

APL is one of the largest producers of ethanolamines, morpholine, alkyl morpholine and gas treating solvents in India and is a global supplier of organic chemicals which find wide applications in oil refineries, natural gas plants, ammonia plants, petrochemical plants, electronic, pharmaceuticals and agrochemicals industries. APL is a major manufacturer and exporter of MDEA which is used in oil refineries as sour gas sweetening solvent with considerable energy savings. The company currently exports 70-80% of its manufactured MDEA to Oil Refining companies located in Middle East and Southeast Asian Countries.

The year 2012-2013 continued with a high degree of uncertainty and volatility in the Indian as well as in the global economy due to recession in European Markets and downgrading of sovereign rating of several countries in Europe. During the year under review inflation remained above 9% level compelling the Reserve Bank of India (RBI) to continue tightening the liquidity running in the system. This has adversely affected the borrowing costs of the Corporates since Banks did not cut lending rates. Despite of all these challenges, recession and exemplary high costs in the business, your Company had withstood the pressure and reported better earnings.

Your Company's expansion project for Propoxylation facilities was completed during the year under review and has become operational, thereby making the Ethoxylation plant more versatile. Certain Ethoxylated/Propoxylated products were developed in the R&D and the Company has started exporting some products. The Company continues to explore the possibilities of developing more Ethoxylated and Propoxylated products for the Oil & Gas and other related Industries. The Company is exploring the possibility of marketing the same in the International markets. During the year under review, the Company has further added 20% to its Ethoxylation facility.

In order to supplement the Furnace Oil boiler, the Company has installed an additional high capacity Briquette Fired Boiler which would be operational by September, 2013. This will reduce the Fuel Oil consumption and thereby a lot of saving in fuel cost. Further, the Company has currently put up an additional column, as it is running short of distillation capacity of its specialty amines. This would enable the Company to double its line of production of specialty amines – not having to refuse to customers. Moreover, the Company has made certain additions/modifications to its Plant & Equipments to increase the production of MDEA and Specialty MDEA.

SUBSIDIARY COMPANIES PROGRESS:

As on 31st March, 2013 the Company has two Subsidiaries, viz. APL Infotech Ltd., where it is holding 51% equity and APL Engineering Services Private Limited, a wholly owned company.

The fabrication unit of APL Engineering Services Private Ltd. which was set up at Khopoli has become fully operational as on date. During the year under review, the Company received few more orders from Engineering companies which have been completed and delivered satisfactorily. Further, during the current year, the Company received sizable orders and its order book position is satisfactory. The Company has also tied up with a large Industrial House for doing Fabrication work and is expected to receive regular orders for fabrication job work from them. APL Engineering Services Private Ltd. is also undertaking various fabrications work for its parent company to assist in timely completion of its expansion activities, thus saving costs.

APL Infotech Limited received an order for a Chilled Water Pipeline system from the overseas market and the customization of the software is complete. Demonstration of the trial runs is being carried out for the

same. The customization of the software is also completed and the software will be delivered / installed at the Customer's site by the end of the current Calendar Year. This will be the Company's 1st Show-Case Project in the Middle East.

APL Infotech Limited has also tied up with one of the largest Software Companies in India for marketing of its software in Domestic and International markets and expects results from them. The Company is also in talks with the largest Gas Transportation Company in India for installation of the software on their cross country gas transportation. Since this type of software is being developed for the first time in India, marketing of the same is time consuming and we expect good results in future as gas transportation will be in great demand in the country in future.

**SIGNIFICANT ACCOUNTING POLICIES AND NOTES FORMING PART OF THE
FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2013**

NOTE - 27

A) SIGNIFICANT ACCOUNTING POLICIES

1. GENERAL

- (a) The financial statements are prepared in accordance with the Generally Accepted Accounting Principles (GAAP) applicable in India under the historical cost convention except for certain fixed assets, which have been revalued, in accordance with the applicable Accounting Standards (AS) notified in Companies (Accounting Standard) Rules, 2006 and on the principles of a going concern.
- (b) The Company follows the mercantile system of accounting and recognizes income and expenditure on the accrual basis except those with significant uncertainties.
- (c) The accounting policies have been consistently followed.

2. USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principals (GAAP) requires management to make estimates and assumptions that affect the reported amount of assets, liabilities and disclosures of contingent liabilities on the date of financial statements and reported amounts of revenue and expenses for that year. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively.

3. FIXED ASSETS

- (a) Fixed Assets are stated at cost adjusted by revaluation in case of Leasehold Land, certain Buildings, Plant & Machinery, Research & Development Equipment and Effluent Treatment Plant.

The recoverable amount of such assets is estimated as the higher of its net selling price and its value in use. An impairment loss is recognized whenever the carrying amount of such assets exceeds its recoverable amount. Impairment loss is recognized in the statement profit and loss. If at the balance sheet date, there is an indication that a previously assessed impairment loss no longer exists, then such loss is reversed and the asset is restated to the extent of the carrying value of the asset that would have been determined (net of amortization / depreciation), had no impairment loss been recognized.

4. DEPRECIATION

- (a) Depreciation on Fixed Assets (Except Gas Cylinders on which higher rate of Depreciation has been provided) is provided on straight line method at the rates and in the manner specified in Schedule XIV to the Companies Act, 1956. Further, in the case of revalued assets, depreciation is calculated on straight line method on the revalued amounts at the rates as determined by the valuer. The difference between the depreciation on the assets based on such revaluation and that on original cost is transferred from Revaluation Reserve Account to Profit and Loss Account.
- (b) Depreciation on Oxygen Gas Cylinders & Nitrogen gas Cylinder is provided on the basis of anticipated life, as certified by a Chartered Engineer, on straight line method @ 5.5555% & @ 10% per annum respectively.
